

Carrots pencils at the ready

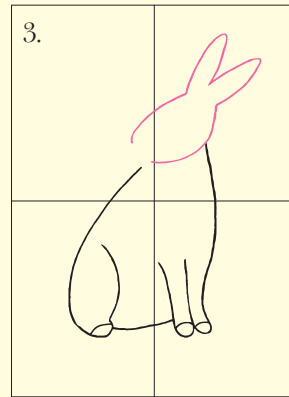

Bunnies can be found wandering all over Mini prints this month, but they want to hop into your world. Learn how to draw your very own bunny with a step-by-step from our in-house print designer.

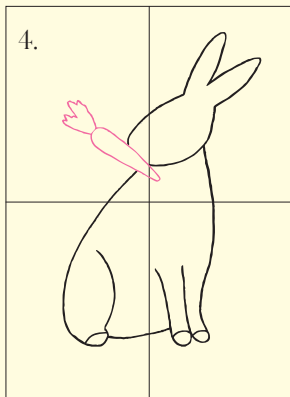

Draw the outline of the bunny's body.

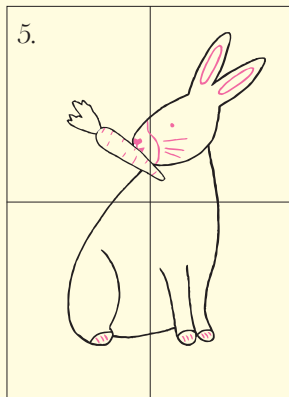

Add the legs and paws.

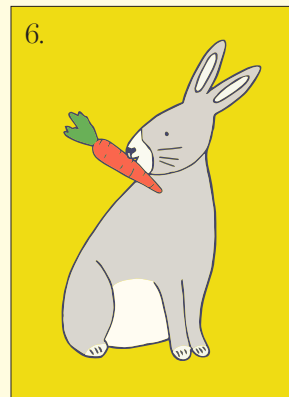

Draw on the head, leaving space around the mouth.

Make your bunny happy with a carrot.

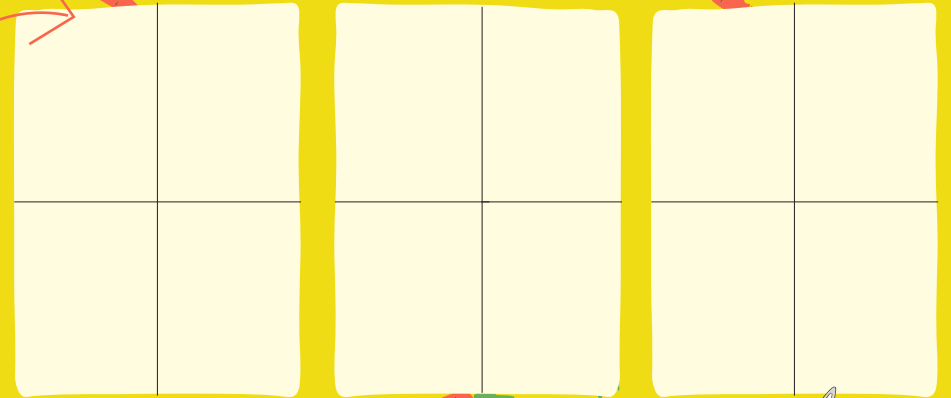

Bring it to life with a face and inner ears. Then put lines on the carrot (to make it extra tasty).

All that's left is to colour it in and give it a name.

It's your turn. Use the grid to help you put the lines in the right place.

Now you've mastered drawing, let's try colouring.
How many bunnies can you spot on our print?
